ABOUT ME

Software developer and ICT engineering student at Oulu University of Applied Sciences, with 20 years of customer service experience in the restaurant industry. I enjoy building practical things, from embedded devices and autonomous drones to web and mobile applications. I bring strong teamwork and communication skills to a technical team, and I stay calm under pressure.

PROJECTS

Laser Drone – Optical Control Link — 2026 – ongoing
Flying a drone over a laser beam instead of a radio link, in the DefTech North program with Noptel Oy. Ground station software with beacon tracking on a pan/tilt gimbal and gamepad control mapped to MAVLink.
Python · OpenCV · MAVLink / ArduPilot

Interceptor Drone – Autonomous Flight — Summer 2026
Quadcopter that finds a balloon with computer vision, flies to it and lands next to it without pilot input. Built with Oamk Dronelab.
Python · MAVSDK · YOLO / TensorRT · Jetson Orin Nano · ArduPilot SITL + Gazebo

Movie Database – Full-Stack Web App — OAMK, 2026
Group project: movie app with reviews, favourites and user groups. Database schema, JWT login, search filters and UI design.
React · Node.js · PostgreSQL · Docker · TMDB API

Uunimakkara Tutka – Android App — Personal project
Location-based app that finds nearby lunch restaurants serving a specific dish, built with AI-assisted development.
Kotlin · Google Play Services · Jsoup · GitHub Actions

ATM System — OAMK course project
Qt desktop client with a REST API backend. Backend development: CRUD endpoints, stored procedures, JWT authentication and CI/CD.
Node.js · Express · MySQL · C++ / Qt · Swagger · GitHub Actions

SpedenSpelit V2 – Reaction Game — OAMK, 2025
Arduino reaction game with displays, sound, light effects and EEPROM high scores; designed and 3D-printed the enclosure.
C / C++ · Arduino · Blender
